- RENDER
- FIGMA
- FIREBASE

EDUCATION

ST.WILFRED'S PG COLLEGE

- (BCA) Bachelor of Computer Application (3rd-Year) - pursuing

SENIOR SECONDARY (12 GRADE)

- Stream : - Science

PROFILE SUMMARY

I'm a Full-Stack Developer with experience in building responsive and interactive web applications. On the frontend, I work with HTML, CSS, JavaScript, React.js, and Tailwind CSS to create clean and user-friendly interfaces. On the backend, I use Node.js, Express, and MongoDB to build robust and scalable applications. I also have hands-on experience with state management, API integration, and collaborative workflows using Git and GitHub. Currently, I'm expanding my skillset by learning TypeScript to write more maintainable and type-safe code.

INTERNSHIP

FULL STACK DEVELOPER

Full Stack Learning , Jaipur   SEPTEMBER2024 -PRESENT

- I've developed real-world projects like a Jewelry E-commerce website using React.js, Node.js, Express, and MongoDB, where I also implemented Google authentication and designed a dummy payment flow with a custom UI. Along with that, I built fun and interactive projects such as a Pokémon App, To-Do List, and a Memory Game using HTML, CSS, JavaScript, React, and Tailwind CSS. These helped me gain solid hands-on experience with responsive UI, state management, and API integration.
- Currently, I'm working on a Chat App project to sharpen my skills in building real-time applications, while continuing to grow as a Full-Stack MERN developer. I'm also comfortable with Git and GitHub workflows for team collaboration.

PROJECTS

CHAT-APP
- React.js – Built a responsive and dynamic frontend.
- Node.js – Managed server-side logic and APIs.
- Express.js – Created RESTful backend routes.
- MongoDB – Stored users, Messages

LUXE JEWELS
- React.js – Built a responsive and dynamic frontend.
- Node.js – Managed server-side logic and APIs.
- Express.js – Created RESTful backend routes.
- MongoDB – Stored users, products, and orders.
